

A Cleanup We Can
All Live With

Santa Susana Field Laboratory Community Advisory Group

Do You Know?

Why the AOC Cleanup at SSFL is Bad for Our Community

It's Unnecessary

The AOC replaces a 2007 commitment to clean the site to the EPA suburban residential risk-based cleanup standard which is fully protective for the designated future parkland, its visitors and wildlife, without tens of thousands of trucks.*

Dangerous for Our Community

The AOC requires an unprecedented 2.1 million cubic yards of soil to be removed and places our nearby neighborhoods at risk from the excavation activities, heavy truck traffic, increased accidents and exhaust pollution. As many as 200,000 trucks over 10 to 15 years!

Destroys Future Parkland

The AOC Cleanup strips the former Santa Susana Filed Laboratory site of the natural, historical and archaeological resources that make it worthy of parkland. The AOC cleanup also harms the key Simi Hills Wildlife corridor and opens the door for development.

Our parkland will be trucked away!

Unproven

The AOC Cleanup plan can not be proven to improve the health and safety of our community.

It's a Political Cleanup

Politicians interfered with an approved cleanup plan at SSFL and hatched the unprecedented AOC plan without considering the concerns of technical experts. It hasn't been used before, anywhere!

* Administrative Order on Consent = Cleanup to background.

We Need a Cleanup Our Community Can Live With!

What You Can Do To Help

**This future parkland needs your help! Please visit our website and attend our meetings.
Ask your representatives to support a cleanup that preserves the former Santa Susana Field Laboratory as a park.**
